

A grade above.

Biodegradable Hang Tags and Swing Tags.

Ramko offers a range of biodegradable and environmentally friendly solutions for Trims and Packaging. We believe it is important to offer cost effective environmentally friendly or reusable packaging solutions to our clients to provide brands with a choice. Ramko guarantee all the production facilities adhere to strict standards regarding working conditions and ensure that they are both environmentally and socially conscious.

Please find below details of some of our solutions:

Biodegradable Starch Resin

This fully biodegradable solution looks and behaves like normal plastic materials meaning it can be injection molded and dyed to almost any Pantone colour. It can be combined with organic cotton string for example to offer a fully biodegradable solution. The material is often used for shoes, belt, glove, scarf hangers and small hooks and swing strings.

Ramko can also combine this material with wood and other products to create the perfect solution for our clients. The composition of the raw material is as follows:

- 65% Starch
- 10% Fat
- 10% PP
- 15% Other Additives

The raw material is a light yellow/beige colour so it is not possible to make a pure white product although most Pantone colours are possible. The material absorbs moisture and therefore easily decomposes by microbes within 360 to 720 days.

Wooden Products

Ramko can offer a range of wooden products in a variety of shapes with laser, printed, engraved or hot stamped logo options. We have made wooden hang tags, boxes and packaging solutions as well as Swing Strings. Ramko have experience ensuring safe transit and storage of these products including anti-mould treatment and fumigation. Our logistics team are used to handling the shipment of these goods and can assist to ensure a seamless transit.

Wooden products can be combined with various fabrics and corn starch materials to make unique hang tags and packaging products and all wooden items can be prepared natural, with varnish or painted to achieve colour versions.

Organic Products

Ramko can offer a range of organic strings and Swing String products to combine with natural or organic hang tags. In addition, we can produce various organic bags or packaging materials as required.

Recycled Products

Ramko offer a range of recycled or recyclable materials in terms of paper based products and plastic products. Please contact our office if you would like to know the options available to you.

Re-Usable Products

Ramko appreciate that not every brand can embrace the environmentally friendly look within packaging and we also encourage and recommend various re-usable packaging options such as EVA bags for example. This has the benefit of giving a company enhanced branding, adding value to your products and also avoiding the packaging of your products being thrown away on purchase.
