

R4

Elastic Staple™ Fastening System

- ✓ **Barely visible fasteners**
- ✓ **Lean and eco-friendly packaging**
- ✓ **High flexibility**
- ✓ **Fast and easy to operate**

Retail Packaging made easy.

Ramko's entry level R4 VNS packaging machine is an all-round talent for a multitude of retail products such as toys, cosmetics, beauty products, kitchen utensils, cutlery, hand tools, bike parts, outdoor accessories like carabiners and many more!

The R4 has been specially designed for manufacturers packing low volumes or with low volumes per product but vast product ranges who need flexibility. The R4 can quickly and seamlessly switch from one product to another. The R4 is also perfect for a brand producing overseas but need the ability to re-pack some items quickly and efficiently locally. The R4 allows these customers to take advantage of the eco-friendly Elastic Staple™ Fastening System without a large capital investment.

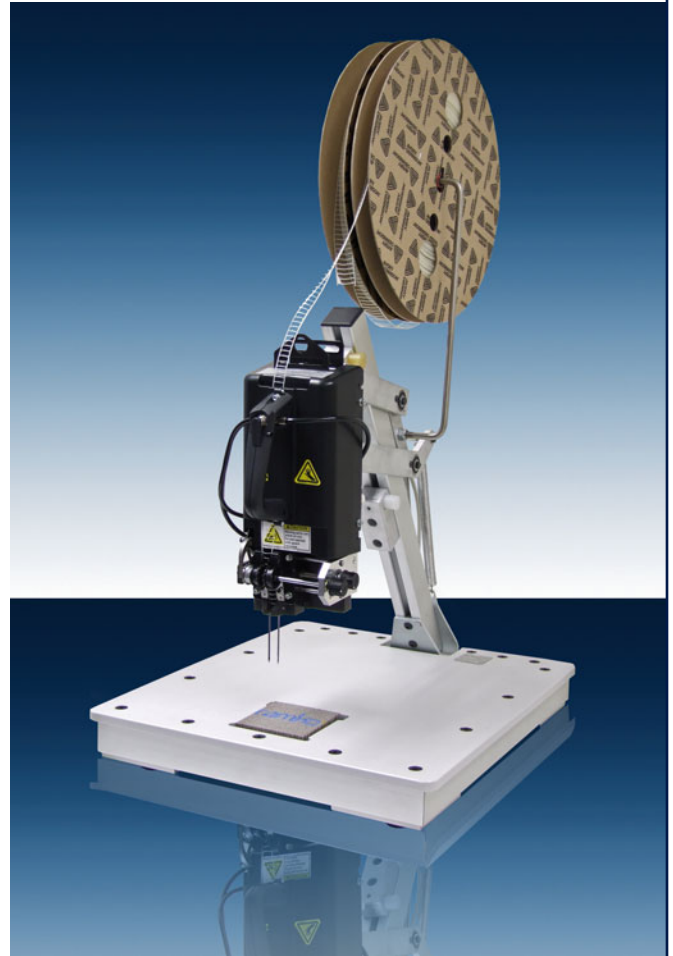

powered by VNS

R4 - Packaging made easy.

The Ramko VNS packaging solution is the entry level solution for automated packaging and a perfect replacement for blister packing and cable ties or twist ties. The machine offers the following advantages:

- **Easy to set-up and use with Ramko's unique design – a true plug & play solution.**
- **Significantly faster than hand held solutions and much easier and less strenuous for workers to operate.**
- **More cost effective and environmentally friendly than blister solutions and allows the end customer to touch and feel the product.**
- **Elastic Staple™ visually enhances the display of your products.**
- **Helps reduce expensive packaging and packaging waste therefore reducing recycling fees.**
- **Eliminates the cost of pre-punching header cards.**
- **Products are easy to remove from packaging and the staples do not damage the products.**
- **Staples are available in a whole range of lengths, transparent and black version and are child-friendly.**

With the Variable Needle System (VNS) and the wide range of staple lengths available, the R4 can package all your retail products. Variable stoppers and jigs can be used to provide exact product positioning on your packaging for every product and there is no longer a need to purchase packaging or cards with pre-punched holes as the needles make the holes.

Ramko offer a free of charge sampling service, so please feel free to send your products to the nearest Ramko office and let us transform your packaging. All products will be returned, packed with the VNS Elastic Staple™ and a video to show how these were packed. Alternatively, Ramko are always happy to visit your company to introduce our packaging solutions and advice you on the optimal solution for your products. Ramko also offer all forms of packaging materials at competitive rates - please contact us for a quote or samples.
